EMIGRATION FROM AMERICA.

BUSINESS CIRCLES ALARMED.

Employers of labour and bankers in the U.S. are greatly alarmed over the possibility of a heavy emigration of aliens, and fear serious consequences unless the movement is checked. Since the American war, emigrant aliens have been crowding every outgoing ship, the only limit being the capacity of the vessels. At the present time, in the transition period between war and peace, there is a surplus of labour, so that the loss of emigrants would be a hardship. With the revival of industry, however, which American business men believe to be not far distant, the shortage of labour will be distinctly felt and will tend to keep wages, which emigrants insist must be lowered if the price of commodities are to be reduced.

Bankers are interested in this extraordinary movement because of the drain it is making upon the cash resources of the country. The American Bankers' Association has sent a circular letter to savings banks throughout the country, urging them to use their influence to dissuade aliens from emigrating.

An alarming proportion of the 14,000,000 aliens who have been in the country since the war, are now in the hands of the banks, selling their Liberty bonds and coupons for the purpose of returning to Europe. The New York Custom House authorities announce that emigrants are carrying with them from \$400 to \$5,000 each in United States currency. The astounding statement is made in the circular that 1,200,000 aliens cannot be stopped from going, and that they will carry with them nearly 2,000,000,000, or four-fifths of the total currency in circulation and in reserve in the United States before the war. It is estimated that unless vigorous action is taken over six million aliens may be lured abroad, taking with them cash equal to the total currency resources of the United States.
