FREE TRADE AND CAUSES OF THE WAR.

THE WAR.

The veterns economist, Professor Luje Brentane, lectured the other day at Munich on Free Trade, and in this connection entered a public protest against the "desire" of Count Soden the former Bavarian Minister of the Interior, that the vacant Chair of Political Economy at the vacant Chair of Political Economy at the vacant Chair of Political Economy at champion of Protestien. He branded such a "desire" as an attempt to compel science to teach what is wanted type the fashion of the moment. On the subject itself he remarked that it was not true that German's become prependerantly an industrial country she would have long since lost the war. In his opinion at the propulation, and pointed out that had not Germany become prependerantly an industrial country she would have long since lost the war. In his opinion at all if the system of Free Trade had been allowed to sprend, and if the world since the seventies had not increasingly iturned away from it.. The circumstances that England, in artificially maintaining carried out the essential part O Cobclus, programmic constitutes one of the cause of the present war, but the aggressive character assumed by the German potentive laring, with the creation of synchrotic constitutes one of the Cause of the green war, but the aggressive character assumed by the German potentive laring, with the creation of synchrotic constitutes one of the Cause of the green war, but the aggressive character assumed by the German potentive laring the condemnation of the Mittel Europa idea and by an appeal for an understanding between the nations.

light, sir or egase. The people live with their shimals; vernin, including the plaque-earry-ing rat, abound. There is no system of conservancy, water supplies are foul and often infected files are everywhere. A typical interest of the system of the syste

shown, some zeal for c'evalinies and improvement.

1. It is a second of the topic leasures are not altogether wasted on the fellaheen and that at
the present time when the propel of one wiltogether wasted on the fellaheen and that at
the present time when the propel of one wilad, a spirit of emulation is sometimes aroused.
This is a hopeful sign and we believe that,
one a beginning is much progress may extion is exercised.

Array experience has shown that the Egoptima
formerly thought impossible and those but
qualified to judge state that no people are so
easily managed as the fethbases.

VILLAGE INCINERATORS.

easily managed as the follaheen.

VILLAGE INCINERATORS.

We would draw attention to Appendix 13° (Note on Village Sanitation emburted by Dr. Williams) which given a rough estimate of the Agoptian village Sanitation embutted by Dr. Agoptian villages by the establishment of a conservancy system with incineration in all habitants, based on experience in two villages near Alexandria (Manura and Abukir). The interaction of the Agoptian villages of

VILLAGE CONSERVANCY.
A consideration of the enrormon prevalence of out-of-diseases as analysistemissis and billar-risk and the state of the interior group, at another dysentery, etc., post in the dissemination of disease in Egypt and at once indicates a question most urgently calling for attention, analysis whereing for the dispease of feares with a minimum of risk. Here this can best be accomplished under the conditions ob, taining in the system Reprise of the dispease of

in the report which cannot be reproduced in a newpaper. Ed. "E.G.").

olred and will doubtless require considerable experiment before a scally practical self-sine and economical system; is evolved. The question is however, so imporatint, and likely to how such farreaching, effect in improving the self-sine should be lost in its consideration. In the first latency, one of two different types of the first latency, one of two different types of the self-sine should be lost in its consideration. In the first latency, one of two different starting observed and controlled. In this way the merits and disadvantages of the different types to unit local conditions. As soon as a practical and efficient method is elaborated, this could be gradually extended to other villages with the product of the conditions of the self-size of the conditions are suggested by previous experience.

VILLAGE PLANNING.— CHALMA NO — MODEL

VILLAGE PLANNING.— CHAIMA NO — MODEL.

In connection with schemes of saniary reform in Exprian villages the Commission virtual villages to Commission virtual vice and the certain villages in the vicinity of Danashear which have been built by the Wafaf Minstry. Chains suggests to our sinds reiber a postal street, and open spaces it is an example which should not be copied in Exprt. Public lating the control of light and weutilation, and in consequence to the control of light and weutilation, and in consequence of light and weutilation, and in consequence the rooms are dark and sirless. If a reason-the room are dark and sirless and reason-the room are dark and sirless. If a reason-the room are dark and sirless in competence of the room of the reason of the reason of the room of the room

BIRKAS.

BJRKAS.

The Birka is not often used as a source of drinking water, but it is highly dangerous of drinking water, but it is highly dangerous of an analysis of the parasite of Bilharniania, it may form a mongointo nurser, and it is not improbable that its banks may often confidence of the parasite of the property of the confidence of the parasite of

FOOD CONTROL.

FOOD CONTRUL.
Food control is practically non-existent, though a beginning have been made notably in Alexandria and, to a certain extent, in Cairo. This control is lutimately bound up which require much greater attention than they at present receive.
Few of the upper classes, we imagine, have food in prepared and handled.

The ship production of the United States in June amounted to 280,400 tons, dead-weight, which constitutes a record. The total production in 1918 to date is 1,084,670 tons.

We have received the following circular Cairo, August 1, 1918.

We have received use intowing electricities.

We also can be considered to the consideration of the consideration
