(By Morums Correspondent).

(by Morums Gorrespondent).

There has been quite a lot of (so-called)
Spanish Pever about this last few weeks
and the weather has not been altogether
playing cricket. Hot and humid days,
coasional decidedly cool nights and the
general laxity felt by everyone, all indicate the changing of the season. The
cold weather is not yet with us but every
indication says "pepa".

SECRETS OF ECONOMY.

SECRETS OF ECONOMY.

"There are two great series of economy," remarked a friend who came in other store the other days are days with such a shortage of woolless.

We are happy to infurn our friends

cularly, bee early with such a soundered considerate happy to inform our friends that we have just received some comparatively large, shipments of all-rood under-clothing which we are putting on safe now. You'll find warmth and health in Morums underwoor, Satisfaction and Economy gand in hand with Hygiene. There's only one thing to down.

GET IT AT MORUMS
AND GET IT NOW.

EUCLID LIVED HERE.

Euclid lived here, and, after founding his great mathematical school, left those Elements' from which generations of Elements' from which generations of the property of the principles of geometry. There, too, Archimedes laid the foundation of the science of liquids, explained the theory of the lever, and invented the burning glass and the screen-younp. Andret measured the earth, while Hero made the first steam-engine. The great Bruchion library was gradually increased to four hundred thousand volumes of meusical the state of the school of the school

FUNERAL PYRE OF GREECE. FUNRRAL PYRE OF GREECE.

It was the funeral pyre of the glory of Greece. The hard-minded Romans, the Prussians of their day, who succeeded to buttons to science comparable with those of the race they had defeated. It is true that Mark Antony, Julius Cassar's friend fare, but the lost books could never be replaced. Slowly, however, Alexandria dream before the placed. Slowly, however, Alexandria caquired fresh manuscripta, attracted more men of science, and became again the intellectual become again.

TWO OTHER TRAGEDIES.

TWO OTHER TRAGEDIES.

Under the rawaging invasions of the Testonic tribes of Northern Europe the Roman Empire fell, and the prestige and viality of the wonderful Green kind desayed. There were fer important of the wonderful Green and the resident of knowledge remained stored in Alexandria, where a little band of the guardinat of the human mind continued foully to cherish the treasures of the great library text, tearning was regarded as optowed to religion, and a mob of fanatics marched on the library towards the end of the fourth century and for a second time description of the second time description of the fourth century and for a second time description of the second time description of the fourth century and for a second time description of the

of wisdom passed from the hand of the Arab back to the hand of the European. In all, two thousand years of thought, re-search, and experiment were lost. Tens of thousands of men of genius failed to flower and make the general mind fruifful because they lacked the fertilizing pollen of learning that had been barrsed in Alexandria. There was to admire. There was be lappire and more passeful if John the Grammarian had one-ceded in saving his library. The history of every race would have been altered.

WHAT MIGHT HAVE BEEN.

The New World might have been as led in the age of the Norsemen; the ste narine might have been a great practi nartument of work in the Middle Ag reeing slave and serf from the hard oil; and the germs of disease would probly have been traced and subdued known as the state of th ably have been traced and surrobe. To before Pasteur found the microbe. To Great War would hardly have been, it has come about by the survival of tark spirit of tyranny which could a have lived in the light of a wiser world
