SPANISH INFLUENZA IN

EGYPT.

THE DISEASE AT ALEXANDRIA.

Owing to the appearance of some cases of what is currently known as Spanish influenza ut Alexandria, the Municipal doctors have during the past few days impected those quarters of the city and the state of the city and the cit

has been the much-talked-of. outbreak of botulism. This is a disease which ought to arise from imperfectly cooked food, but although we have lived a very abnormal dietetic life recently the classe met with here are probably not of food origin, but quite likely due to some new variety of micro-organism affecting the nervous sys-tem. Influence is an Italian word meaning an epidemic. The term is grippe, applied to it in the French is derived either from a Slavenic word meaning hoarseness or from its habit of suddenly seizing people whilst in good health.

Telephone girls, at General Pershing's request, have become a part of the United States war machine. Between seven and eight thousand women answered the ap-peal with alacrity. Two hundred and fifty, have been selected, and 100 have slready been sent-out.
